TATISHCHEVO ICBM COMPLEX, USSR
COMPLEX SUPPORT FACILITY
ADMINISTRATION AND HOUSING AREA

The administration and housing area of the complex support facility for the Tatishchevo ICBM Complex (Figures 1 and 2) is located at 51-40N 45-38E, on the eastern periphery of the town of Tatishchevo and north of the Atkarsk-Saratov rail line. The railhead and storage area of the complex support facility is located on the western periphery of the town.

25X1D The administration and housing area was reported as a military barracks
and training area [redacted] Photography [redacted]
25X1D [redacted] revealed the extensively built-up area to be in direct support of the
ICBM Complex and tied into the complex support facility. Construction of this
25X1D facility was started [redacted] No specific date can be assigned
due to the lack of photographic coverage.

25X1D

The hardened command and control facility is a unique facility for Type IIID complexes; however, it is identical to those observed at the 6 Type IIIC complexes. This is logical since these 7 complexes (Tatishchevo, Aleysk, Dombarovskiy, Imeni Gastello, Kartaly, Uzhur, and Zhangiz-Tobe) are common in that they are all single-missile-system complexes, and were deployed during the "second wave" of construction. This facility consists of a command bunker under construction in an excavation, a 3-story command support building, and an extensive antenna farm.
